

How to Download the EWBridgePay App for iOS:

To download the app for Android, please see page 2.

STEP 1

Type the address **https://is.gd/Velo110Prod** directly into the Safari browser and select enter. Please note, this address is case sensitive.

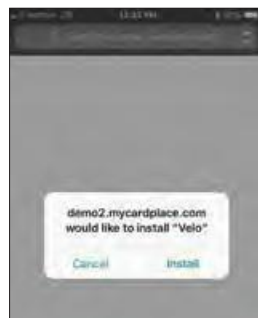

STEP 2

Select **Open**, once the **Open this page in iTunes?** notification appears.

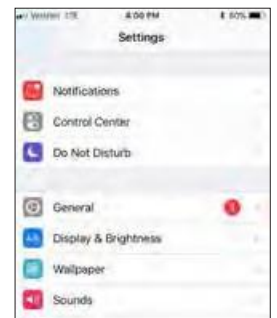

STEP 3

Select **Install**, once the **demo2.mycardplace.com would like to install "Velo"** notification appears.

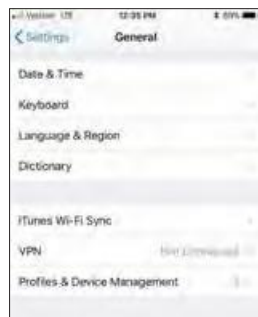

STEP 4

Exit your browser and select the **Settings** app on your homepage, followed by the **General** tab.

STEP 5

Then select the **Profiles & Device Management** tab.

STEP 6

Lastly select the **i2c Inc** icon.

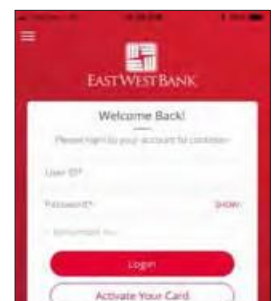

STEP 7

Select **Trust "i2c Inc"** on the following page and then **Trust** once the **Trust "iPhone Distribution: i2c Inc" Apps on This iPhone** notification appears.

STEP 8

You're all set to begin using your EWBridgePay mobile App! Select the app on your homepage and **Activate Your Card** to register.

How to Download the EWBridgePay App for Android:

STEP 1

Type the address **https://tinyurl.com/Prod109Velo** directly into your mobile browser and select enter. Please note, this address is case sensitive.

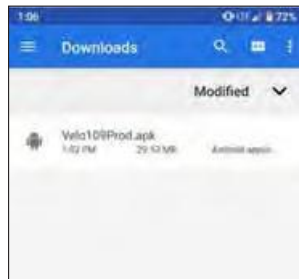

STEP 2

Select **Ok**, once the **Do you want to keep Velo109Prod.apk?** notification appears.

STEP 3

Exit your browser and select the **Files** app on your homepage. Once inside select the download titled **Velo109Prod.apk**.

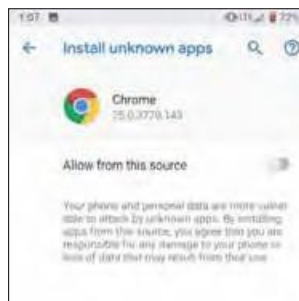

STEP 4

Once the **Your phone is not allowed to install unknown apps** notification appears, select **Settings**.

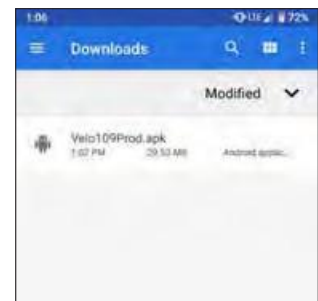

STEP 5

Then select **Allow from this source** on the following page that's prompted.

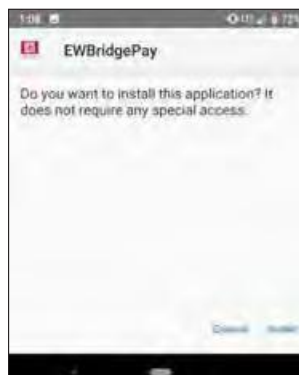

STEP 6

Exit this page and select the **Velo109Prod.apk** download again from the **Files** app.

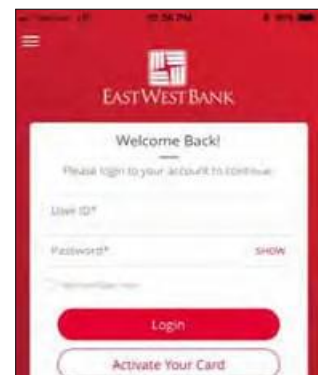

STEP 7

Select **Install**, once the **Do you want to install this application?** notification appears.

STEP 8

You're all set to begin using your EWBridgePay mobile App! Select the app on your homepage and **Activate Your Card** to register.

*Depending on your model of Android and the browser used, there may be some variations to the steps above. For instance, Step 2 may instead ask for permission to download, Step 3 may instead have the Files app labeled Files Manager or Downloads, and Step 4 may require settings to be selected independently, rather than automatically being prompted. Specific steps on how to download an unlisted app, may be obtained by contacting the maker of your phone.
